

What is the Online Training Platform?

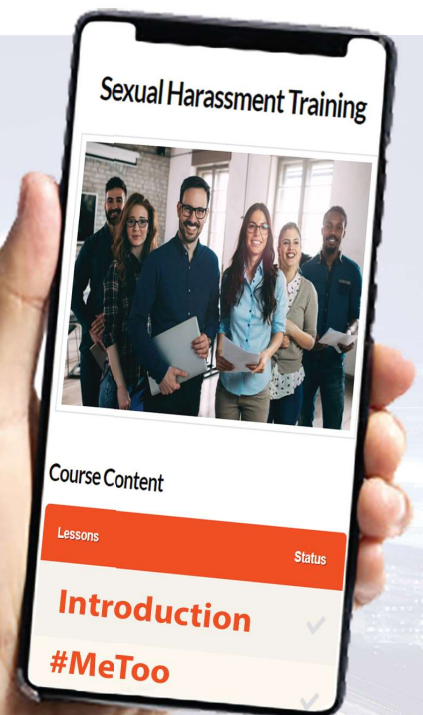

The Online Training Platform is a full-service portal to house your company's Human Resources and Health & Safety training products and documents in one place. Its ease of use is ideal for workers to access your training manuals, employee handbook, health & safety manual, and other policies and procedures. The back-end database has been set up via the video and quizzes to track the progress of your learners. By providing a captivating interactive environment with dynamic content, online training not only effectively keeps your workers up-to-date but engaged as well.

Online Training Platform

HR Proactive's Learning Management System (LMS) with compliance training courses offers the following benefits:

- Convenient one-stop shop for all your training and policy needs
- Meet your H&S and HR compliance standards
- White Label Solution, customized with your company logo/policy
- Affordable subscription pricing
- Advanced record-keeping features and printable reports
- Track learner progress in real-time via back-end database
- Group Management Account
- Conveniently add new hires
- Easily train new workers or provide refresher training
- Employee secure sign-in
- Printable Certificate of Completion
- New courses developed annually based on client need
- Just the courses you need, not a library you pay for and don't use
